from the inner side of the building toward the probable launch point, indicating the probability of rails servicing the launch positions. Unidentified objects appear on the white-toned areas on the perimeter roads between several of the building entrances.

ILLEGIB

A cylindrical structure is centrally located at each launch site, those at Sites B, D, and E appearing open at the top and those at Sites A and C covered. They also appear to vary in height.

Cables are apparent leading from the cylindrical structures to the vicinity of the launch points at Sites A and C. There are indications that cables may be earth covered at the other sites. A connection between the cylinder and the site control building is visible at Site A.

The launch site control buildings are earth mounded at each site. Two possible vents are visible on top of each mound.

A rectangular object measuring approximately [REDACTED] is located on launch
